

Instructions

Use this questionnaire to apply the Ice House Entrepreneurship principles to your own business

You may type directly into this document or copy and paste the questions into a Word or Google document to complete your responses. Once finished, save your file and upload it using the submission box in the lesson.

This exercise is designed to help you:

- Think like an entrepreneur
- Recognize opportunities hidden inside problems
- Translate insight into action
- Strengthen your decision-making as a founder

There are no right or wrong answers — only thoughtful reflections that help you build clarity and momentum.

Take your time with each question. Specific, honest answers will create the most value.

Section 1: Ideas Come from Opportunities

Successful entrepreneurs don't start with technology — they start with opportunity.

1. What opportunities have you observed in your market or community?

Where are customers struggling with problems that current solutions don't adequately address?

There is a significant opportunity to provide AI based instruction and encouragement for cohort programs

2. How did you identify your business idea?

☒ 0) Personal experience ☒ 0) Customer conversations

☒ 0) Market observation

(✔ 0)Other (Type your answer above the line)

Personal Experience

Briefly explain your answer.

I run a cohort program so I know the need exists

Section 2: Opportunities Exist in Problems

Entrepreneurs see problems differently — as signals of opportunity.

3. What specific problem does your business solve?

Describe the customer pain point clearly and concretely.

Being cost effective in running a cohort program is important. Instead of paying an admin \$1,000 per month and having them work 5 hours a week. I have developed a platform that provides more timely and better responses and only cost me \$5/month to run.

4. How significant is this problem for your customers?

If possible, quantify the cost in time, money, risk, or frustration.

It requires 5-10 hours per week and \$1,000 per month in costs. Often this function and responsibility gets overlooked and we do not offer timely responses to our entrepreneurs.

5. What additional problems in your industry might represent untapped opportunities?

An opportunity to be a reminder for these assignments and also offer encouraging feedback along the way. I also think that recommending learning articles and YouTube videos could be an interesting additional feature.

Section 3: Action Is the Foundation of Success

Entrepreneurial learning happens through action, not planning alone.

6. What concrete actions have you taken to test your business idea so far?
(Examples: pilot, customer interviews, prototype, MVP, early sales, etc.)

Running it with Cohort 12

7. What is ONE action you could take in the next 7 days to move your business forward?

Add the video and learning article addition.

8. What is currently holding you back from taking faster action?

Nothing.

Section 4: Knowledge Comes from Learning

Strong founders build feedback loops into their business.

9. What have you learned so far from customers, competitors, or early experiments?

Waiting to get feedback from Admins.

10. What data or signals are you currently tracking to improve your product or service?

Input from our students

11. Who could you learn from right now?

(Mentors, customers, partners, industry experts, etc.)

Ed Tech platforms.

Section 5: Wealth Comes in Many Forms

Entrepreneurial value extends beyond revenue alone.

12. Beyond financial returns, what other forms of value does your business create?

(Examples: customer impact, community benefit, personal growth, access, efficiency, etc.)

Social Capital through introductions

13. What does success look like for your business across multiple dimensions?

Better outcomes for our entrepreneurs.

Section 6: Wealth Is Created, Not Taken

Great businesses expand the total value in the system.

14. How does your business create NEW value rather than simply competing for existing dollars?

Gives program admins time back

15. What efficiencies, innovations, or improvements does your solution generate?

Efficient time usage

Section 7: Successful People Work for Themselves

Entrepreneurship increases agency — for founders and customers.

16. How does your business give you greater control over your economic destiny?

Provides a better user experience for our entrepreneurs

17. Does your business model increase autonomy or opportunity for your customers or team? How?

No

Section 8: Successful People Share Their Wealth

Long-term businesses create shared value.

18. How are you currently sharing the value your business creates?

(Employees, customers, community, partners, etc.)

EIRs are making this a part of their review before they talk with an entrepreneur

19. How might you build wealth-sharing into your model as the business grows?

For each new ESO give 10% of the fees generated back to the community

Final Reflection: Your Entrepreneurial Lens

20. What are your TOP THREE insights from this exercise?

1. I have work to be done
2. I have opportunity to capture
3. I can become more efficient

21. What is ONE specific action you will take in the next 7 days based on what you learned? Work on implementing an encouraging quote.

Next Steps

Save this completed document and upload it using the submission box in the lesson.

Your responses will help strengthen your entrepreneurial judgment and guide your next steps in the program.
